

COMMANDER/REHAB

COMMANDER 360

CABANA SERIES

2L DECON

3L DECON

DIESEL DECON

If you work in the Fire, Public Safety, Emergency Response, Civil Defense, Disaster Remediation or Medical industries and require secure, quickly deployed temporary facilities or shelter we have your solution!

Since 1998, Nor E's mission in the design and manufacture of unique functional "Ready To Respond" emergency response products has been to serve the real needs of those who serve the nation.

The **Commander** mobile operations platform creates the space meeting demands, essential functions and services at remote emergency incidents. As a highly mobile expandable shelter, the Commander quickly transforms from a compact 8' x 20' trailer into 280 to 530 square feet of environmentally secure workspace, that is up & off the ground. Ideally suited for Fire Ground Rehab, Command/Control, Housing, Medical Surge, Mobile Communications.....the system will perform multiple functions for your community, and do so effectively and flawlessly.

Easily towed by any standard medium duty vehicle, the Commander can be configured to be fully self-contained including power, hygiene (toilet, sink, and shower), workspace, storage, and with the elbow room to get the job done. Require even more space?.....Link one Commander to another.... to another...just "***Imagine the Possibilities!***" !

The **MEDecon** line of mobile decontamination trailers provides turnkey cleaning capabilities within minutes of arrival on scene. Multi-purpose in design MEDecon's provide fully self-contained features to decontaminate crews, responders, CBRN casualties (ambulatory & Non-amb) as well as equipment. All MEDecon units feature full mechanical & storage systems, and are designed for full containment of contaminants & victims.

Nor E is Ready To Respond!

Let us help you serve others with the most unique, multi-function mobile operation platforms available worldwide.
