

...The Firefighter's #1 Choice in

Positive **P**ressure **V**entilators

Stronger, lighter stainless steel frame with vibration dampers so unit stays put.

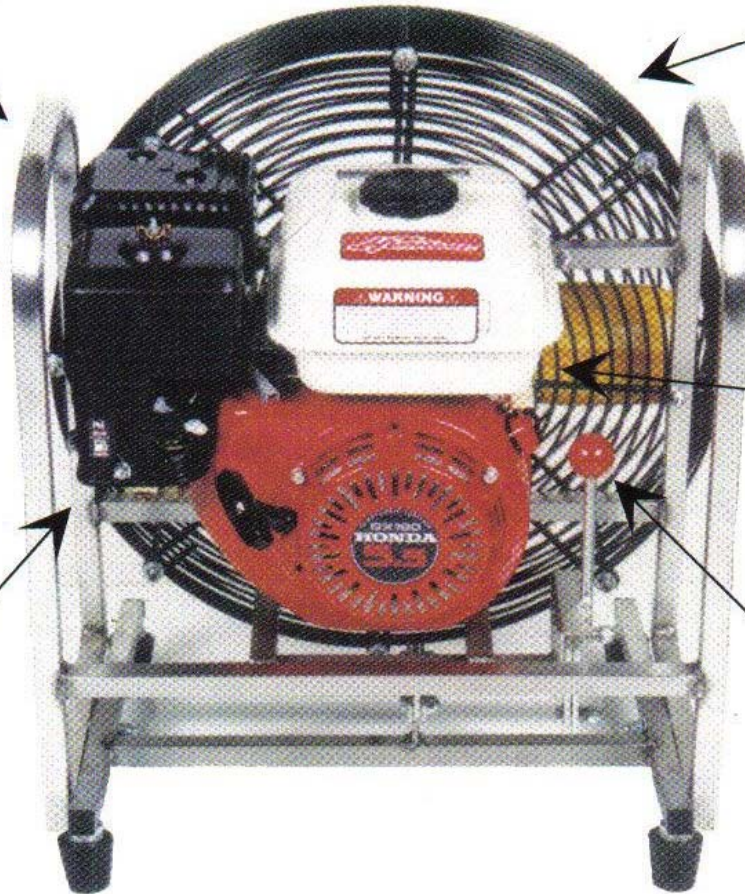

Heavy-duty vinyl-coated free-air guard for maximum airflow and durability.

High performance, epoxy coated, laminated wood prop designed for maximum C.F.M. and safety.

Automatic oil-alert and tip switch. Automatic decompression for fast and easy starting. Maintenance-free ignition system.

Throttle, choke, fuel shut-off, and On-Off switch are conveniently located on front of engine.

Quick-tilt control provides split-second adjustment to any angle, even with gloves on.

The HURRICANE ADVANTAGE...

SPECIFICATIONS

Our original design features a free-air style guard and epoxy coated laminated fan blade. This design allows air to be pulled in from the sides of the fan, which produces more airflow than other types of fans. While other companies claim "highest C.F.M.'s", **we guarantee it in side by side comparison tests.**

HM-20-5.5-- Our most popular unit, this fan has the power to handle most calls, and yet is compact enough to fit in more compartments than other fans of comparable performance. *Wheels and handle are available as a factory installed option.

Combine this outstanding performance with reliable **HONDA** power, our superior stainless steel frame, which includes vibration dampers, Quick-Tilt control, and our **5-YEAR WARRANTY--** and it's easy to see why more fire-fighters are making HURRICANE their #1 choice in PPV.
