

NEW PRODUCT from

4010 FOAM-FAST™

15gpm, 30gpm or 50gpm 1.5" Foam Applicators

The Scotty 4010 Foam-Fast™ units are simple and effective tools for deploying a foam surfactant/wetting agent onto a fire scene from the end of a 1-1/2" fire hose. When connected to a hose line, the 4010, available in 15, 30 or 50 gpm flow rates, works by diluting a solid foam cartridge into the water flow. The foam/water solution then passes through the patented Scotty Air-Aspirating Foam Nozzle producing low expansion foam. Each 4010 Foam-Fast™ unit comes with six foam cartridges. Each 12" long foam cartridge will last up to 30 minutes (at 75psi). The foam cartridges are 100% biodegradable and contain no toxic materials.

**4010-50
Foam-Fast™**

To operate, open the inlet side of the mixing chamber, insert a single 12" long foam cartridge, reseal the inlet end cap, attach to a hose, open the pistol grip shut-off and spray foam. The 4010 Foam-Fast™ is recommended for use with water pressures between 50 psi and 125 psi (maximum 150 psi).

Each 4010 Foam-Fast™ unit comes with either a 15gpm, a 30gpm or a 50gpm Nozzle, 15" long Mixing Chamber, two Pistol Grips (one with D-Handle Shut-Off) and six 12" long foam cartridges. The Scotty Foam Cartridges (stock code 4010CART12) are biodegradable and are available separately. Order stock code 4010-15 for a 15gpm unit, a 4010-30 for a 30gpm unit and a 4010-50 for a 50gpm unit. Please specify 1-1/2" NPSH, NHT or BSP threads when ordering.

**Each unit comes with
six foam cartridges!
Each foam cartridge
lasts up to 30 minutes!
Suggested List
of \$298 USD!**
